HAMZA TAWEEL

Hebron, Palestine | +972-595872094 | LinkedIn: linkedin.com/in/hamza-taweel-423741329 | GitHub: github.com/Hamza-Taweel

PERSONAL STATEMENT

Computer Science graduate with experience in front-end development, dashboards, and software projects. Skilled in using AI tools to support my work, with an interest in data analysis and continuous learning. Experienced in working within teams and eager to further develop my skills by contributing to real-world projects.

WORK EXPERIENCE

Frontend Developer Intern — IzTechValley (Elevate Program by Gaza Sky Geeks)

Hebron, Palestine | 3 Months (480 Hours)

- Participated in a paid intensive training program through Gaza Sky Geeks.
- Developed dynamic and responsive landing pages and user interfaces.
- Built **Enzyme**, a comprehensive dietary clinic management platform built with Next.js, actively used by dietary clinics.
- Collaborated effectively with cross-functional teams and nutritional care providers to deliver production-ready software solutions.
- Awarded Official Internship Certificate and Recommendation Letter.

Network & Python Trainee — Smart University College for Modern Education

Hebron, Palestine | 3 Months

- Completed practical technical training focused on Python programming and core computer networking principles.
- Configured network tools, connection protocols, and network infrastructure management essentials.

EDUCATION AND TRAINING

Bachelor of Science in Computer Science — Hebron University

Hebron, Palestine | Graduation Year: 2025 | GPA: 88%

- Graduation Project: Clinical Training Management System for the Faculty of Human Medicine at Hebron University.

Agile MBA — Fully Funded Scholarship — Chingu

Q4 2026

- Six-week professional training covering Agile methodologies, leadership, teamwork, and business fundamentals.

KEY PROJECTS

Clinical Training System – Full Stack Developer

- Designed, developed, and deployed a clinical training management platform for the Faculty of Human Medicine at Hebron University.
- Developed RESTful APIs using ASP.NET Core, designed the database schema using SQL Server, implemented a responsive user interface with CSS effects, and generated reports using Crystal Reports.

Enzyme – Dietary Clinic Management Platform – Frontend Developer

IzTechValley

- Developed a responsive and user-friendly frontend interface for a real-world dietary clinic management platform currently used by multiple clinics.
- Collaborated with nutritional care providers to understand requirements, developed a modern user interface using Next.js, integrated APIs, and contributed to building a solution actively used by real clients.

Matjirha – Store Plans Platform – Frontend Developer

- Developed a responsive frontend for a dynamic platform showcasing store subscription plans, with clear differentiation between the features of each plan.
- Implemented a clean and responsive design across different screen sizes to present plan tiers and their benefits clearly and effectively, providing a simple and user-friendly experience.
